

# the benefits of call forwarding

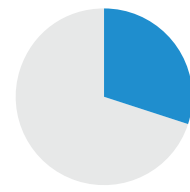

24/7

## Brand Representation

Increases one's availability to a caller

Makes a business of any size feel established and legit

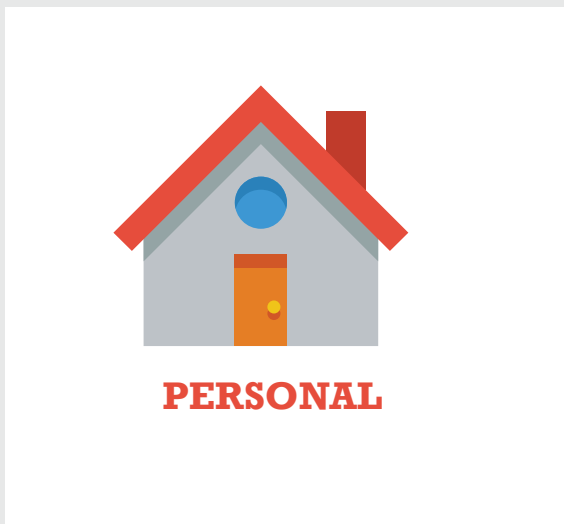

30%

Sales increases can be expected when using call forwarding services

Global Call Forwarding Services benefit a diverse group of users, including:

- multinational corporations that use it to manage their international customer support centers from one location
- mid-sized businesses that use it to connect with remote employees in different countries
- start-ups that use it to convey credibility as an established business
- individuals that use it to promote their independent consulting services
- anyone that wishes to be reachable regardless of their current location
- any company that is attempting to penetrate a new market in another country and must create a local phone presence in that country quickly
